Hassayampa River Preserve Wickenburg, AZ

New Checklist of Birds

Originally published 1987, Rev. 1989, Rev. 2006-16

The 770-acre Hassayampa River Preserve is owned by The Nature Conservancy (TNC) in Arizona. **The mission of TNC is to conserve the lands and waters on which all life depends.**

This 294-species checklist is based on the **American Ornithologists' Union (AOU) 2015 list**. It includes 218 species with monthly observations according to the legend at the beginning of the checklist. Rare species in the checklist include banded birds and those observed at least four times. The 76 Rare/Accidental species at the end of the checklist represent those seen fewer than five times during the last ten years and not banded.

The original checklist was created in 1987 by Jeffrey Cooper, then HRP Naturalist, from many contributions. Over the years, a log was kept of observations including the Christmas Bird Counts, the May Migratory Bird Day counts, our year-round bird-banding program and eBird confirmed sightings by visitors. This newest list is based on the original, modified by these observations over the last ten years and revised bird order per the new AOU list with DNA order modifications.
